pdf content displays as a blank page. That's just wrong. So what can be wrong? That's when you start looking into the code of your site. When you look at your page, do you see a big blue and white folder icon on the bottom right-hand corner of the browser? Yep. That folder icon tells us the application has to be coded using HTML. HTML is the language which all modern web developers understand. HTML was created by Tim Berners-Lee and other notable people to help web developers communicate with each other. But HTML, it's not the only language to help you communicate with other web developers. You have a choice to use HTML, CSS, JavaScript or any other language you want to help with your web page. What's the big deal? We are not using these languages to code our projects. We are coding using HTML so that other developers will understand our code. When you visit a website, it is coded in HTML. We don't care if it is coded in CSS or JavaScript. The important thing is, if you want your project to work fine, it has to be coded in HTML. You can use any other language for your code, but your project won't work if it is coded in any other language. Okay, so you are sure that your file is coded in HTML? Okay, now let's take a look at the code and see what's wrong with it. If you are viewing this in Firefox, look at the source code of your website. We have our website here and if you look at the source code, you will see, we are working with an image file called home.jpg. This image file is part of the folder which is under the website's folder. You will see, we have a file, which has a lot of codes in it. If you look at the codes, it is a mix of HTML, JavaScript and CSS. If you want to view the codes and read them, then you can view them on the right-hand side of the page. For now, we will take a look at the code for the image file. Here it is, view it on the right-hand side of the browser. The text which is written in the image file, is HTML. The picture is coded in the image tag. It has an extension.jpg and it has been saved in a folder named home. This is all there is. Now what if this
