2018 A: Your RegEx is very naive - it is checking for 3 instance
of the 0xXX0128XX character sequence, which you have no way
to control. You need to be more specific. I've changed it to detect
only your ASCII 0x21 character. `^b[#0-9A-F]{2}\s\d{4}\b/g` `\b`
Matches between word boundaries; you should eliminate that.
`[#0-9A-F]{2}` Captures 2 of the allowed characters `\s` Matches
any whitespace, e.g. space, tab, newline. `\d{4}` Captures 4 digits
`\b` Matches between word boundaries; you should eliminate that.
The body of the regex will match all the characters within the
hashtags, e.g. Sample code `const regex = ^b[#0-9A-`
`F]{2}\s\d{4}\b/g; const str = `#0x21.0x28.0x01.0x00`
`#0x28.0x01.0x20 #0x2C.0x01.0x00 #0x2A.0x00.0x01`
`#0x21.0x03.0x00 #0x29.0x01.0x00 #0x2A.0x00.0x00`
`#0x2C.0x01.0x00 #0x2A.0x00.0x00 #0x21.0x02.0x00`
`#0x22.0x01.0x00 #0x21.0x00.0x00 #0x 570a42141b`
