Sometimes the iDrive screen or navigation freezes and you have to wait 20 minutes to reset it yourself. I would like to be able to use the iDrive screen data reset feature if required. Is there a way to enable this option or should I reset everything using the reset button? If you disable this feature, the iDrive screen will be locked for 15 seconds before you can use it again. This is not recommended as it may cause security issues. If you're using navigation mode, you can disable this feature in your navigation settings.
