PDF Password Recovery Product Key Full [Mac/Win]

KeyMacro is a Mac OS X utility that lets you quickly launch programs based on a specific word or phrase. You can store custom key sequences, create rules that trigger programs from either Finder or keyboard shortcuts, or generate launch commands for... PDF Password Recovery - PDF Password Recovery is a piece of software that enables you to recover passwords from PDF documents. PDF Password Recovery is a piece of software that enables you to recover passwords from PDF documents. So, if you need to open a PDF document, which you want to keep private, you can use this software to recover the password. This software is also useful if you are sharing files with others and want them to be able to access your file without knowing the password. Key features of PDF Password Recovery There are a lot of features that PDF Password Recovery

has. Below, we will mention some of the main features of PDF Password Recovery: Search PDF documents

PDF Password Recovery can scan PDF documents and find the content of the document. To do this, the software will have to open the PDF file and then the search will be launched. The software will search the document for all the occurrences of a specific text string, and will open the corresponding files when a match is found. The only limit to the search is the size of the document. If the document is big, then the searching will take more time. But, if you have a smaller document, then you won't have to wait for a long time. Gather text strings To facilitate the search of documents, PDF Password Recovery has a clipboard manager feature that will keep all the found text strings in the memory. It is also possible to add a list of words that should not be present in the document, and to add new text strings to the clipboard. Recover passwords from a specific file The tool can also help you to recover passwords from a specific file. So, if you want to have all the passwords recovered in one place, then this tool will do the trick. Receive new passwords

When you find a password for a file, then this tool will remember the password and will provide the option to put it in the clipboard. Configure key combos You can create rules that will automatically launch programs from any keyword. The software offers you two options: either you can launch the program using Finder, or you can launch it from the keyboard. System Requirements: Minimum: Mac OS X 10.10.5, or later.
