## Moonshine Crack + With License Key Free Download

Moonshine is a small, easy to use application, specially designed to offer users an IDE built with Adobe AIR, for AS3/Flex Development. This tool will also offer you a small custom-built source editor using Flash Text Engine. So, if you were looking for a software to help you with AS3/Flex Development give Moonshine a try and see if its capabilities can satisfy your needs. The basic features:

- Built-in AS3/Flex compiler
- Built-in AS3/Flex editor
- Built-in Source editor (using Flash Text Engine)
- A simple project management and organization application
- Ability to load project from the workspace
- Ability to save project to the workspace
- Load and save project folders
- Load and save as local files
- Ability to select and execute scripts from the workspace
- Ability to view and modify project settings
- Ability to view and modify file encoding (Actionscript)
- Ability to view and modify project metadata
- Ability to export project and open in Flash Builder or Flash CS
- Ability to export project and open in Flash CS or Flash Builder
- Ability to open a project from the project manager (in Flash Builder or Flash CS)
- Ability to compare two projects
- Ability to view project metadata (in Flash Builder or Flash CS)
- Ability to view and modify the whole project hierarchy (in Flash Builder or Flash CS)
- Ability to view and modify AS3/Flex project properties (in Flash Builder or Flash CS)
- Ability to create new projects
- Built-in compiler and Flex compiler
- Built-in file explorer
- Built-in debugger
- Built-in project manager (in Flash Builder or Flash CS)
- Built-in shell
- Built-in SDK and SDK Manager
- Ability to run, debug and analyze Flex/AS3 code
- Built-in package manager
- Built-in SQLite manager
- Built-in data explorer (in Flash Builder or Flash CS)
- Built-in ADB (Android Debug Bridge)
- Built-in Git GUI (in Flash Builder or Flash CS)
- Built-in SFTP, SCP and FTPS (in Flash Builder or Flash CS)
- Built-in HTTP and HTTPS connection support (in Flash Builder or Flash CS)
- Ability to manage project from the workspaces
- Ability to execute scripts from the workspaces

### Moonshine [Mac/Win]

Moonshine is an IDE for Flex / AS3/ActionScript 3 Development. Unlike most of the previous applications of this type, Moonshine is designed using AIR. This means that Moonshine is not going to require a web browser for its operation, since the entire IDE is running inside the AIR runtime. Unfortunately, due to the nature of the platform, it is not possible to run the IDE on a desktop computer, since the screen used by the IDE will be running inside a web browser. If you want to use Moonshine on a desktop computer, you will have to run it in a web browser, and that browser will not be able to show the IDE itself, since it is running inside the browser. So, it is more of a one-way street. Keymacro Features: Moonshine is designed to offer users a very small, lightweight IDE that is not going to require a web browser to operate, and is not going to be able to show the IDE itself on a computer. This tool is designed to offer a full Flex / AS3/ActionScript 3 development environment, based on a custom-built, Flash Text Engine, written from scratch to take advantage of the capabilities of the platform and the availability of Text API calls. No matter the environment on which you want to use Moonshine, you will always have access to the following key features: Themes to customize the look and feel of the IDE The source code editor, available in either of two modes The code explorer The debugger A console window Requirements: Windows 2000 / XP / Vista / Windows 7 User-Installation: Extract the archive file into a directory on your hard drive. Open the Moonshine.exe application and click on the "install" button The tool should ask you to select the location of the IDE's installation directory In case the "Default" folder is selected you will be directed to a new installation wizard If another folder is selected, you will be shown the list of all existing IDE installation. You can choose between these to locate the directory where the tool is installed. After the IDE installation completes, you can start using it. A: AS3Toolbox is also a small, AS3/Flex IDE based on the Eclipse/SWT Java environment. And it is free. This article may interest you: [What 1d6a3396d6](#)

## What's New In Moonshine?

Moonshine is a small, easy to use application, specially designed to offer users an IDE built with Adobe AIR, for AS3/Flex Development. This tool will also offer you a small custom-built source editor using Flash Text Engine. So, if you were looking for a software to help you with AS3/Flex Development give Moonshine a try and see if its capabilities can satisfy your needs. Features: Provides developers with an IDE-like programming environment for Flash and AIR applications with syntax highlighting for ActionScript 3, Flex, and AOTAS. Moonshine is designed to be as fast as possible. Moonshine offers a Flash Text Editor (for Actionscript 3), written in the same technology used for the editor. Moonshine is compatible with OpenFL. Moonshine Comparison to Other Adobe Flash IDE: Adobe Flash Builder: Moonshine vs Adobe Flash Builder: Moonshine vs FlashDevelop: Moonshine vs FlashDevelop in a Nutshell: Adobe Flash Builder Comparison to Other Adobe IDE: Adobe Flash Builder vs Adobe Flash Professional: Adobe Flash Builder vs Adobe Flash Builder: Adobe Flash Builder vs FlashDevelop: Adobe Flash Builder vs FlashDevelop in a Nutshell: FlashDevelop Comparison to Other Adobe IDE: Adobe Flash Professional Comparison to Other Adobe IDE: Adobe Flash Professional vs Adobe Flash Professional: Adobe Flash Professional vs FlashDevelop: Adobe Flash Professional vs FlashDevelop in a Nutshell: FlashDevelop Comparison to Other Adobe IDE: Features: Creates a FlashDevelop-like editor in an AIR application Compatible with OpenFL For a small, simple application, this is amazing. I just wish I could get FlashDevelop with this. Why OpenFL? The "Flash Text Engine" is the same engine used by Flash, which is incredibly fast (it's written in C/C++). There are also a number of libraries for use with Flash Text Engine.
