

----- My Autoplay Enterprise is an easy to use application which will assist you with creating autoplay menus in just a few clicks. The program has a clean and modern interface. You can start a blank project or select one of the many templates (e.g. business card, features menu, install menu, slideshow, XP menu). So, you can create cool text, a text box, gradient label, web tool, RTF tool, as well as new XP, Vista or Office button, normal label, image, thumbnail, slideshow, GIF image, YouTube, Flash, PDF and Windows Media Player objects. Evidently, all these items are completely customizable. For example, you can edit label properties when it comes to the caption, backcolor, forecolor, font size, transparency and text comment. Page properties can also be changed in matter of background color or image, caption, width and height, icon, background sound and slideshow MP3 and full screen mode. Furthermore, you can select the object action (e.g. run program or open file, explore CD or folder, go to web address, send email, popup message, turn off computer, print image). But you can also select backgrounds and buttons from several templates, duplicate objects, use the "Undo" and "Redo" functions, password-protect your menu, configure button properties, use an ISO and SFX creator and add a new page or duplicate the current one. Also, you can change the interface language, play a video before application startup, add sound effects (for mouse over and mouse click on all objects), set the CD expiration date and key, and more. The program uses a moderate-to-high amount of system resources and includes a comprehensive help file with snapshots and step-by-step guides. We haven't come across any problems during our tests. Too bad the output files have a watermark (only in the demo version). Otherwise, My Autoplay Enterprise works smoothly and we recommend you test it for yourself. My Autoplay Enterprise Screenshots: ----- My Autoplay Enterprise System Requirements: ----- My Autoplay Enterprise Free Version The free version is only available in the demo, so you can't purchase it as a solution. I recommend you to use the full version because it includes most elements and improvements of the program. Moreover, some document templates are just only available in the full version. Your feedback

What's New In My Autoplay Enterprise?

My Autoplay Enterprise is a program which you can use to create and design autoplay menus, presentations, and others. The interface of the program is user-friendly. You can start a blank project or select one of the many templates (e.g. business card, features menu, install menu, slideshow, XP menu). So, you can create cool text, a text box, gradient label, web tool, RTF tool, as well as new XP, Vista or Office button, normal label, image, thumbnail, slideshow, GIF image, YouTube, Flash, PDF and Windows Media Player objects. Evidently, all these items are completely customizable. For example, you can edit label properties when it comes to the caption, backcolor, forecolor, font size, transparency and text comment. Page properties can also be changed in matter of background color or image, caption, width and height, icon, background sound and slideshow MP3 and full screen mode. Furthermore, you can select the object action (e.g. run program or open file, explore CD or folder, go to web address, send email, popup message, turn off computer, print image). But you can also select backgrounds and buttons from several templates, duplicate objects, use the "Undo" and "Redo" functions, password-protect your menu, configure button properties, use an ISO and SFX creator and add a new page or duplicate the current one. Also, you can change the interface language, play a video before application startup, add sound effects (for mouse over and mouse click on all objects), set the CD expiration date and key, and more. The program uses a moderate-to-high amount of system resources and includes a comprehensive help file with snapshots and step-by-step guides. We haven't come across any problems during our tests. Too bad the output files have a watermark (only in the demo version). Otherwise, My Autoplay Enterprise works smoothly and we recommend you test it for yourself.
